

DHANUSH S

Salem, Tamil Nadu, India | +91-9344221217 | dev@dhanushs.in
linkedin.com/in/dhanush-s1006 | github.com/selvarajdhanush108-ai | dhanushs.dev

Professional Summary

Final-year MCA student with a strong foundation in **Java, Object-Oriented Programming, Data Structures, SQL, REST APIs, and software development**. Hands-on experience building mobile and software applications using **Java, Dart, Flutter, Firebase, and databases**. Familiar with **SDLC, debugging, API integration, database management, and application development**. Interested in developing reliable and scalable software solutions and seeking an opportunity to grow as a **Software Engineer**.

Education

Master of Computer Applications

K.S.R. College of Engineering

CGPA: 8.4 / 10

2025 – 2027

Namakkal, India

Bachelor of Computer Applications

Vysya College

CGPA: 8.2 / 10

2022 – 2025

Salem, India

Technical Skills

Programming Languages: Java, Dart, SQL

Core Computer Science: Data Structures, Object-Oriented Programming, DBMS, Software Development Life Cycle (SDLC), Debugging

Backend & APIs: REST APIs, Spring Boot

Mobile Development: Flutter, Android Development, Firebase

Databases: MySQL, PostgreSQL, Supabase, MongoDB

Cloud & DevOps: AWS, Docker, Linux, Git, GitHub, CI/CD

Tools: VS Code, Android Studio

Projects

Real-Time Bus Tracking Mobile Application

2025

- Developed a Flutter-based Android application to capture and transmit real-time GPS data from the driver's mobile device.
- Implemented application logic for location tracking, data handling, and communication between the mobile application and backend services.
- Integrated REST-based services and Firebase for storing, retrieving, and synchronizing real-time bus location data.
- Applied object-oriented programming principles and structured development practices while implementing application features.
- Performed debugging and testing of location tracking and application workflows to improve reliability and usability.
- Technologies:** Flutter, Dart, Firebase, REST APIs, GPS, Google Maps API, Android

Faculty Contact Management Application

2026

- Developed a Flutter-based mobile application to simplify communication and contact management among college faculty and staff.
- Designed structured application logic for storing, retrieving, organizing, and displaying faculty contact information.
- Implemented database integration for managing contact records and providing efficient access to stored information.
- Applied object-oriented programming concepts and modular development practices to organize application functionality.
- Performed debugging and testing to identify and resolve application issues and improve usability.
- Technologies:** Flutter, Dart, Firebase, Android

Experience

DevOps & Cloud Engineer Extern

Zetheta Algorithms Pvt. Ltd.

August 2026

India

- Contributed to a **Multi-Region Disaster Recovery (DR) Architecture** project focused on payment systems.
- Gained practical exposure to cloud infrastructure concepts including high availability, reliability, and disaster recovery.
- Studied strategies for maintaining service continuity across multiple cloud regions.
- Applied DevOps and cloud engineering concepts to support resilient and reliable payment system infrastructure.

Certifications

- Oracle Cloud Infrastructure Architecture
